Dear Don,

Heyco is excited to introduce our Heyco-Tite Liquid Tight Romex Connectors and the Heyco Snap-In Romex Strain Relief Bushing.

---

**Heyco-Tite Liquid Tight Romex Connectors with Integral Sealing Ring are approved for NEMA 6 and 6P Applications. They are the Ultimate in Liquid Tight Strain Relief Protection!**

Heyco-Tite Liquid Tight Romex Connectors have multiple gland

sizes for 12/2 through 14/3 Romex NM-B and UF-B cable. The hub sizes are for use in 1/2" and 3/4" NPT electrical knock-outs or threaded couplings. Additional cable sizes and PG and Metric Hubs are also available - just contact Heyco!

The Ratchet design of the sealing nut assembly provides superior anti-vibration protection and ensures a firm grip on the cable and the Integral Sealing Ring ensures a superior seal at mounting locations every time. **Locknuts are included!**

Heyco-Tite Liquid Tight Romex Connectors are UL listed under File E103540 and are IP 68 rated. They are made from Nylon 6/6 with a TPE sealing gland, have a flammability rating of 94V-2 and a temperature rating of -22°F(-30° C) to 212°F (100°C).

Heyco also has a **Snap-In Romex Strain Relief Bushing (USR-401)** available. The USR-401 fits the widest range of Romex and other flat cable sizes. The captive screw on the part forces the locking flap against the cable and meets typical European requirements wherein the Strain Relief device must remain attached to the panel during cable removal or replacement.

The Heyco Snap-In Romex Strain Relief Bushing easily installs with fingertip pressure locking the bushing into 1/2" NPT electrical knock-out holes (.875" or 22,2mm nominal diameter) with panel thickness up to .125" (3,2mm). The reinforcing ribs in the part provide extra strength and the bell mouth contour, radiused at 1.5x

the exit hole diameter, eliminates the need for a separate cord guard. This part protects cables against forces of pull, push, twist and flex.

The Heyco Snap-In Romex Strain Relief Bushing is UL listed under File E103540 and CSA certified under File 81067. The part is made from Nylon 6/6 and has a 94V-2 flammability rating.
