Heyco UL Approved Thermoplastic Rubber Grommets

Heyco's UL Approved Thermoplastic Rubber Grommets convert raw-edged holes to smooth, neat insulated holes in panels from .03" (0,8mm) to .08" (2,0mm) thick. Easily snapped in place, these Grommets are held securely by a molded bead until deliberately removed. They are UL Approved for applications up to 221°F (105°C), molded from Flex Temp (Thermoplastic Rubber) and have a material temperature index of 257°F (125°C).

Heyco Rubber Grommets

Heyco's Rubber Grommets are used to protect through holes for panels from .063" (1,6mm) to .188" (4,8mm) thick. These Grommets help eliminate sharp edges so your wires are protected, provide vibration dampening and add aesthetic value to your application. Heyco Rubber Grommets are available in 113 sizes that will accommodate mounting holes ranging from .250" (6,4mm) to holes as large as 2.375" (60,3mm) in diameter.

Heyco Thick Panel Rubber Grommets

Heyco also offers Thick Panel Rubber Grommets for panels .250"

(6,4mm) and .375" (9,5mm) thick. These Grommets are available in 38 sizes that accommodate mounting holes ranging from .312" (7,9mm) to holes as large as 2.50" (63,5mm) in diameter.

Most of the Heyco Rubber Grommets are constructed of SBR (Styrene Butadiene); however, some are constructed of Nitrile, EPDM, Isoprene, or PVC. The temperature rating for the grommets is -40°F (-40 °C) to 221°F (105°C).

Heyco Rubber Grommets LabKit

Heyco also offers a Grommets LabKit (**PN 2997**). The LabKit is

perfect for product design departments, experimental labs and for all prototype work.

To learn more about Heyco's Grommets, please visit Heyco's Bushings, Grommets, Bumpers and Feet section on our website by [clicking here!](#)
